

## About Student Swingers

### Welcome to Student Swingers

Swinging is SEX not Emotion:It's no shock that many college students choose to be single when the idea of a committed relationship can cause chaos and waste amounts of time and energy. It seems as if there is no balance for young adults who want to enjoy the benefits of a significant other, yet live in the fast lane like college students who have no strings attached. "Swinging" is a solution that comes to mind for both young and old who prefer this type of casual commitment.As unusual as swinging may seem, the practice in which a person or couple engages in the act of exchanging sexual partners, is more common than society would like to imagine. It helps with just wanting sex to having to form a relationship to get sex. Students are very busy with day to day studying and more often then not don't want to settle down just plain and simply cause there is no extra time for a commitment.
